Imagen general de la cortical. Numerosos glomérulos.

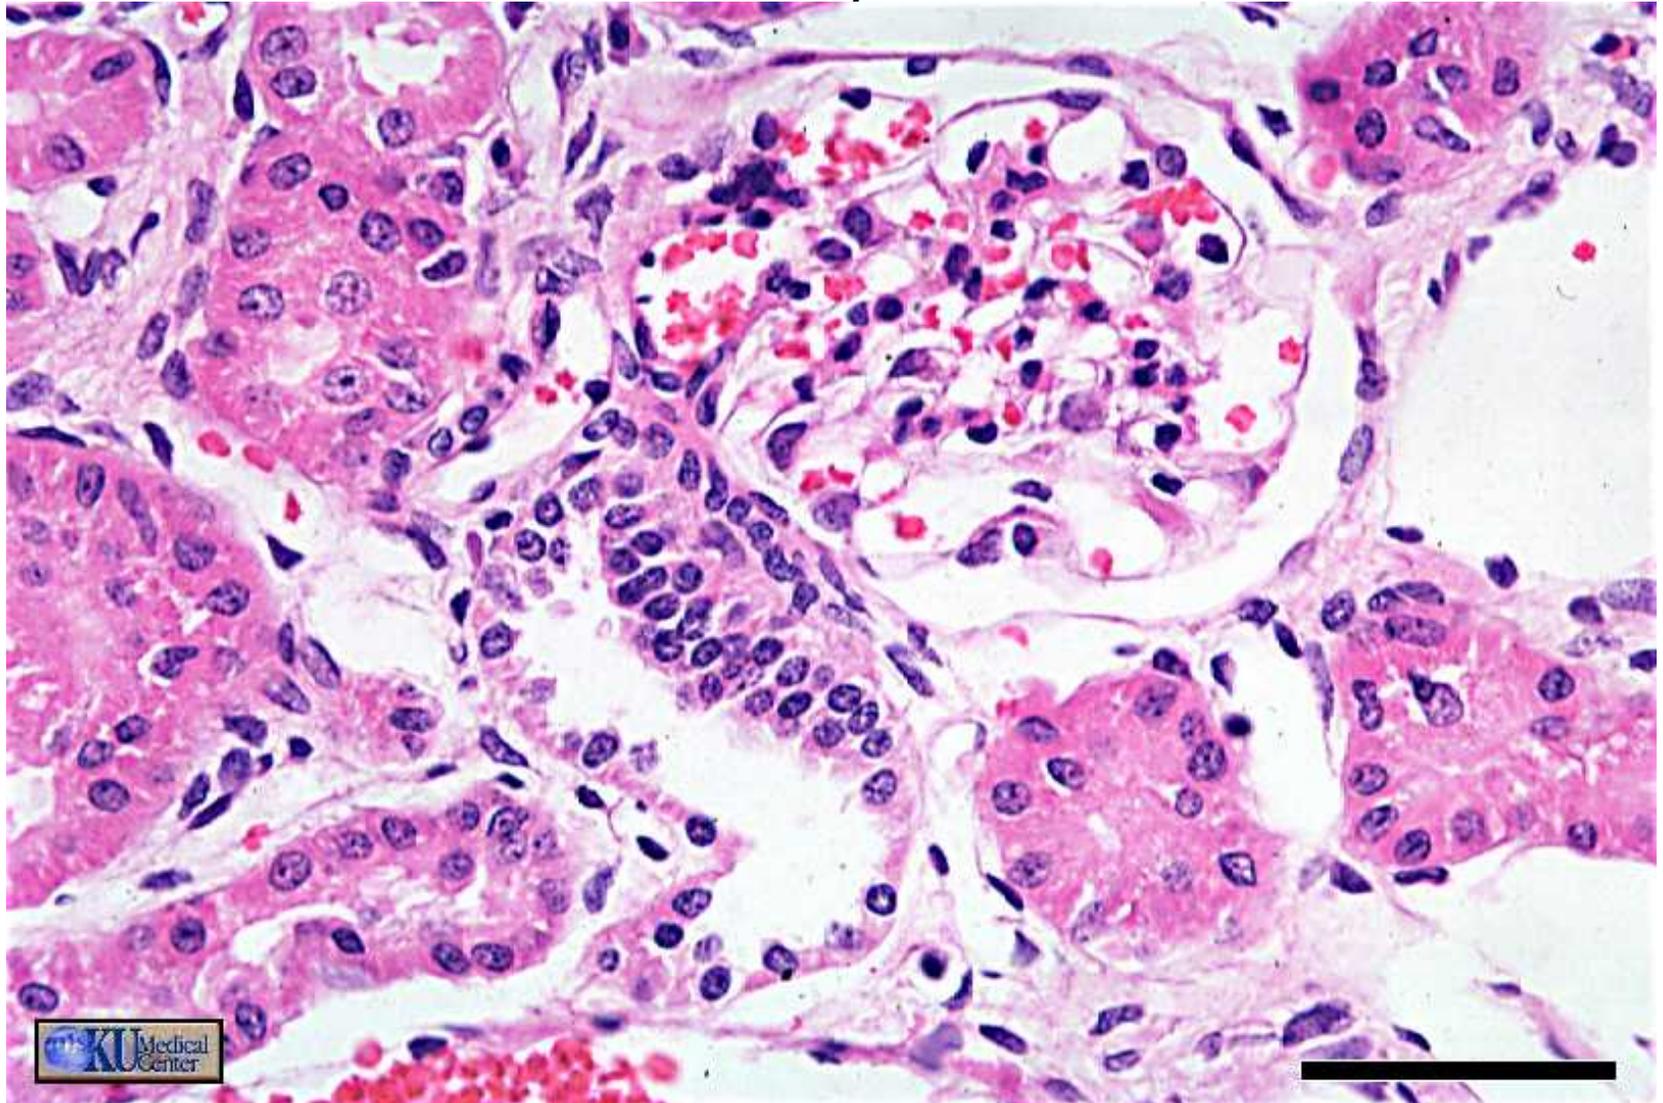

(1) Polo vascular (arteriola aferente) y urinario.
Células de la mácula densa. Identificar capilares,
capa parietal y podocitos.

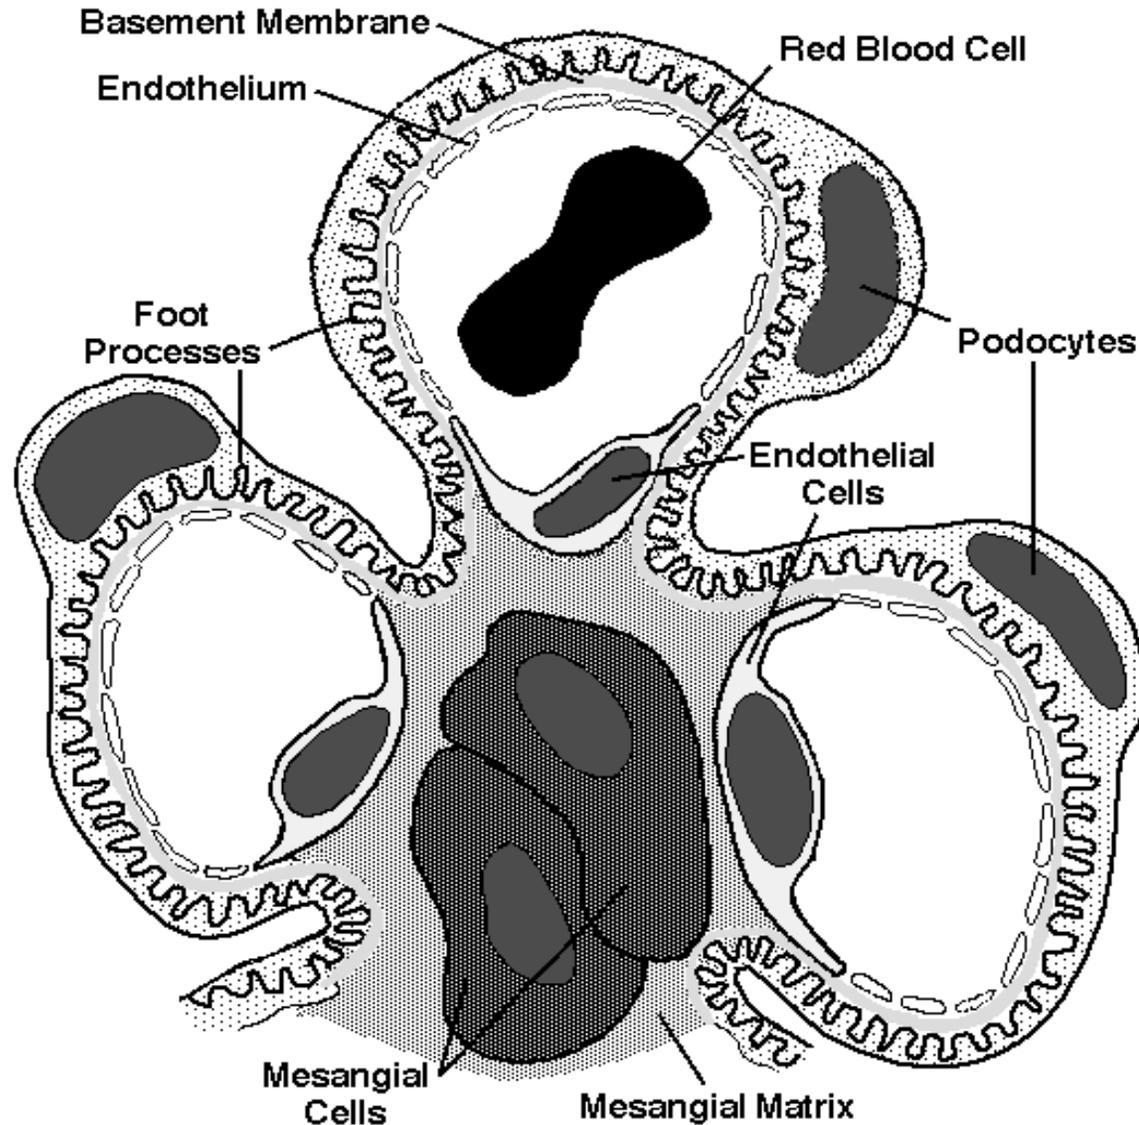

Glómérulo. Mácula densa (TCD).

TCP: eosinófilo, Luz estrecha

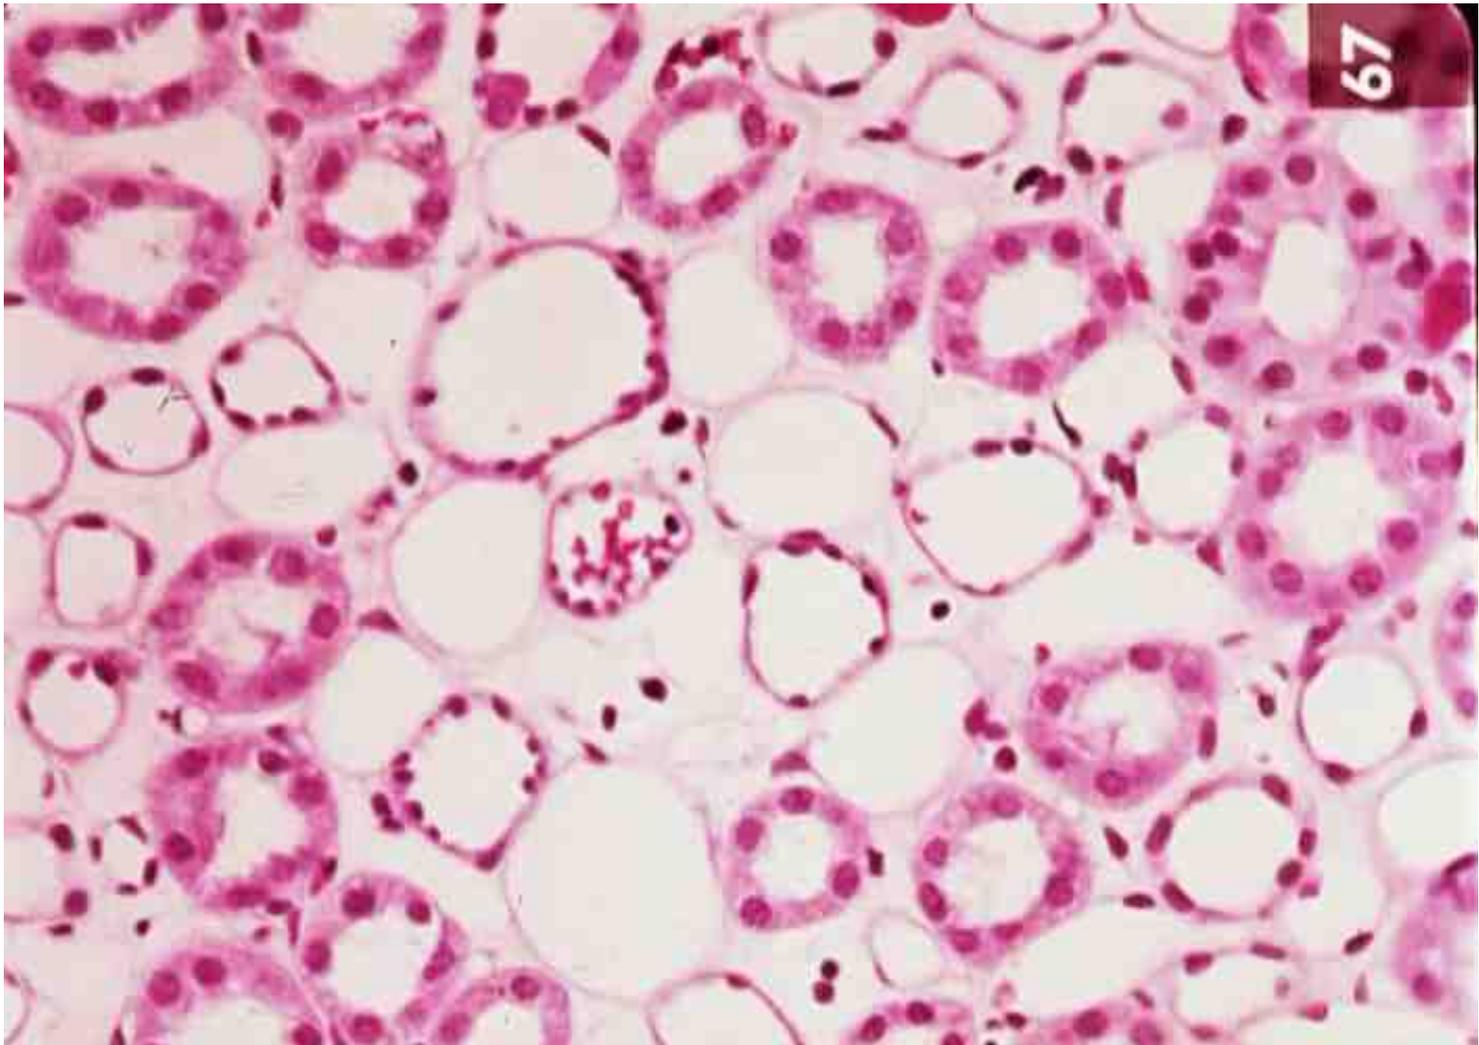

Estructura básica del glomérulo

(2) Túbulos distales: luz amplia, sin chapa estriada.
Túbulo proximal a las 10_11 con chapa.

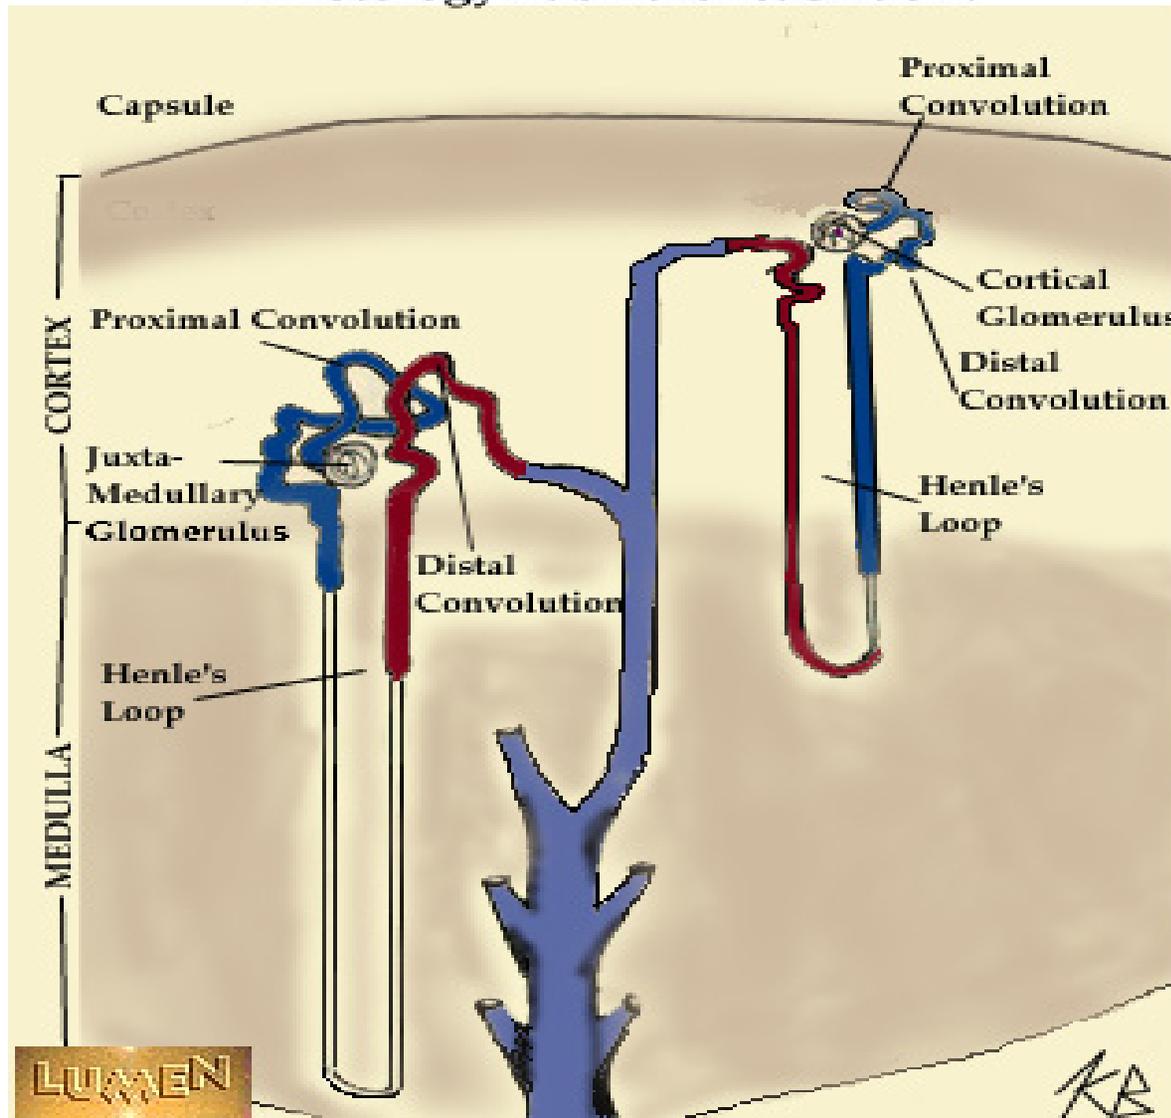

(3) Segmentos delgado y gruesos del Asa de Henle

Nefrona

Histology Lab Part 16: Slide 49

(4) Epitelio transicional. Umbrellas superficiales.
Submucosa. Linfocito
